CAPITAL MANAGEMENT

Capital Structure and Adequacy

The capital adequacy framework applicable to the Malaysian banking entities is based on the Bank Negara Malaysia ("BNM") Capital Adequacy Framework (Capital Components)/Capital Adequacy Framework for Islamic Banks (Capital Components), of which the latest revisions were issued on 14 June 2024. The revised guidelines took effect on 14 June 2024 for all banking institutions and financial holding companies and sets out the regulatory capital requirements concerning capital adequacy ratios and components of eligible regulatory capital in compliance with Basel III.

The risk-weighted assets of CIMB Investment Bank are computed in accordance with the Standardised approach (SA approach) for Credit Risk and Market Risk based on the Capital Adequacy Framework (Basel II - Risk-Weighted Assets), of which the latest revision was issued on 18 December 2023. With effect from 1 January 2025, Operational Risk for CIMB Investment Bank is based on Standardised Approach as stipulated by Capital Adequacy Framework (Operational Risk) issued by BNM on 15 December 2023. The components of eligible regulatory capital are based on the Capital Adequacy Framework (Capital Components).

INTEREST RATE RISK/RATE OF RETURN RISK IN THE BANKING BOOK

For the purpose of this disclosure, the impact under an instantaneous 100 bps parallel interest rate/profit rate shock is applied. The treatments and assumptions applied are based on the contractual repricing maturity and remaining maturity of the products, whichever is earlier. Items with indefinite repricing maturity are treated based on the earliest possible repricing date. The actual dates may vary from the repricing profile allocated due to factors such as pre-mature withdrawals, prepayment and so forth.

The table below illustrates CIMB IB's IRRBB under a 100 bps parallel upward interest rate/profit rate shock from economic value perspective:

Table 18: IRRBB – Impact on Economic Value
